# CRS NG

Introducing **CRS: Central Retail System**. A solution that makes your everyday work easier. You'll always know what's happening in your retail network. Forget Excel spreadsheets. Switch to a new generation of operations management. Perfect control and management in one place.

HOW CAN CRS HELP YOU TO MANAGE YOUR SHOPS?

A single system for the smooth running of your company
Each task or its constituent part is assigned to a qualified worker or a team of people with a clear goal. The system enables **clear evaluation** and provides control mechanisms across all departments.

Clearly defined management and processes
With CRS **unfinished tasks become a thing of the past**. Your precisely defined workflow of tasks and operational processes is constantly monitored and evaluated.

Two clicks and you've got what you wanted
How many clicks do you need to learn the status of assigned tasks across your retail network? Exactly 2! The main priority in designing CRS was **ease of use**.

Sales and HR in one web application
CRS isn't just a tool for sales managers. It's also the perfect solution for HR officers, people out in the field or regional managers. Regardless of who you are, CRS can help you get **better overview** of your work and monitor tasks or time spent travelling.

Bespoke agenda
There's no such thing as a pre-set agenda. Every company is a living organism and needs its agenda **tailored** to its needs. CRS was designed and built with that in mind.

The digital age demands a new approach
Automation saves you time and money. And CRS takes full advantage of that. It's designed for **direct interlinking with your HR system**, which allows it to automatically update all information about employees or upload new hirings. It even automatically responds to the completion of tasks, evaluates it and assigns follow-up tasks to relevant personnel.

WHO TRUSTS IN CENTRAL RETAIL SYSTEM BY NG RETAIL

CRS NG

RETAIL MANAGEMENT
FROM ANYWHERE

TRACKING THE FULFILMENT OF TASKS HAS NEVER BEEN EASIER

CRS shows you all activities down to the most minute detail, giving you complete oversight over everything happening in your retail network.
The system enables you to fully customise tasks and processes without the need to contact the developer. This allows you to refine all parameters of assigned tasks and the automatic responses to their completion to perfection.
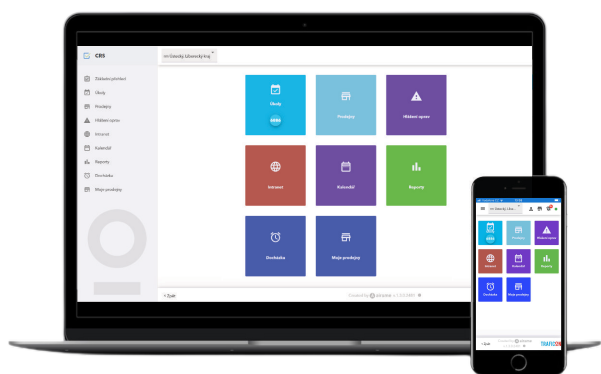

THE ENTIRE RETAIL NETWORK IN A SINGLE WEB APPLICATION

No two shops will ever be exactly the same. But your concept must be unified and coordinated 100 %. This is where the SHOPS section comes in, which will come particularly handy to your managers. There, they simply set which shops they're in charge of and they get an instant overview of sales statistics, required fixes or progress on set targets.

NO ISSUE WILL REMAIN UNRESOLVED

Thanks to an error reporting system, you will know about all issues immediately and can immediately start addressing any breakdowns. CRS thus gives you detailed oversight over your shops and helps ensure trouble-free operation. Questions such as "who is responsible for what" are a thing of the past. Now everybody knows exactly the priority level of assigned tasks, who is in charge of what and what the exact issue resolution scenario is.

A SINGLE WEB APPLICATION TO DO IT ALL. CRS BY NG RETAIL.
