

POS NG WEB

We are adding another powerful sales tool to the POS NG family on the Android platform. **POS NG WEB** enables sales at any point in your store using Android OS devices: payment terminal with graphic display, mobile phone, tablet or PDA device.

POS NG WEB makes full use of the sales functions of the POS, including discounts, promotions and customer sales. It allows you to further search for goods and information about them and conveniently process e-shop orders.

The creation of **POS NG WEB** was inspired by the demand of our important clients, who wanted to give the staff the opportunity to serve the customer anywhere in the store area and to support sales during peak sales periods.

POS NG WEB ALLOWS YOU TO WORK FASTER AND MORE EFFICIENT

There is no longer a need to direct the customer through the entire store to the main cash register. Thanks to **POS NG WEB**, you can handle his requests right on the spot. You can immediately search for the required article, or its variants, or check stock availability. In particular, however, you can make a full sale with all valid events, promotions and customer benefits.

EXPAND YOUR POS NG SOLUTION WITH ANY DEVICES

You can conveniently operate **POS NG WEB** on any Android device such as a smartphone, tablet, payment terminal or PDA device. Thanks to this, the staff is able to serve the customer immediately during the purchase anywhere in the store, or recommend other related goods for purchase... Payment is processed immediately, including customer bonuses, and without the need to stand in line at the checkout.

WHY CHOOSE POS NG WEB?

- Mobile sales support with all the benefits for the customer
- Solving sales peaks (Christmas, sales, etc.)
- Quick sale with the possibility of using cash register peripherals - printer, payment terminal
- Fulfillment of e-shop orders
- Check prices in the sales area
- Enablement of new modern business processes

POS NG WEB BASIC FUNCTIONS

- **Item detail** enables functions such as searching, displaying the product card, checking the price or verifying stocks in the desired size or color, or availability at other stores.
- **Standard sale** extended with functions such as payment with a gift voucher, application of a discount voucher, current discounts and promotions, customer discounts.
- **E-shop** is also a function made available from the checkout for convenient and quick processing of customer orders from the e-shop.

Smart-POS N86

In combination with the most modern mobile Smart-POS payment device, an elegant 4-in-1 solution can be prepared. Thanks to the use of the N86 terminal, you immediately have a **cash register, payment terminal, code scanner and receipt printer** all in one. The main advantage is mobile sales on the entire store floor, which will speed up the entire sales process and save time for you and the customer.

- The ideal platform for POS NG WEB
- POS, payment terminal, scanner and printer in one device
- Time saving for you and the customer
- A suitable addition to the standard sale
- Connectivity via data SIM card or WiFi
- High capacity rechargeable battery
